P R E F A C E

"Agricultural Statistics at a Glance, Andhra Pradesh " is a flagship publication of Directorate of Economics and Statistics, being released every year immediately after the closure of the Agricultural year.

The present report for 2011-12 is the 37th of the series. This report contains cross section and time series data on a wide range of indicators pertaining to agriculture sector. It covers district wise rainfall, Area, Yield and production of crops cultivated in Andhra Pradesh during 2011-12 Agriculture Year.

It gives a synopsis of the Agricultural scenario that prevailed in the state. It provides comprehensive statistical data on seasonal conditions, Area, Productivity and Production of principal crops, Land Utilization and other information relating to Agricultural Statistics.

With a view to ensure wider circulation of the publication, it is being issued as priced publication and simultaneously being released electronically on the website of the Directorate of Economics and Statistics http://www.apdes.ap.gov.in

I trust the publication will continue to serve as a reliable source of information on agriculture and will be useful to Research Scholars, Administrators, and others interested in Agricultural Statistics.

I Appreciate the sincere efforts of the Officers and staff of Agricultural Section in bringing out this publication .

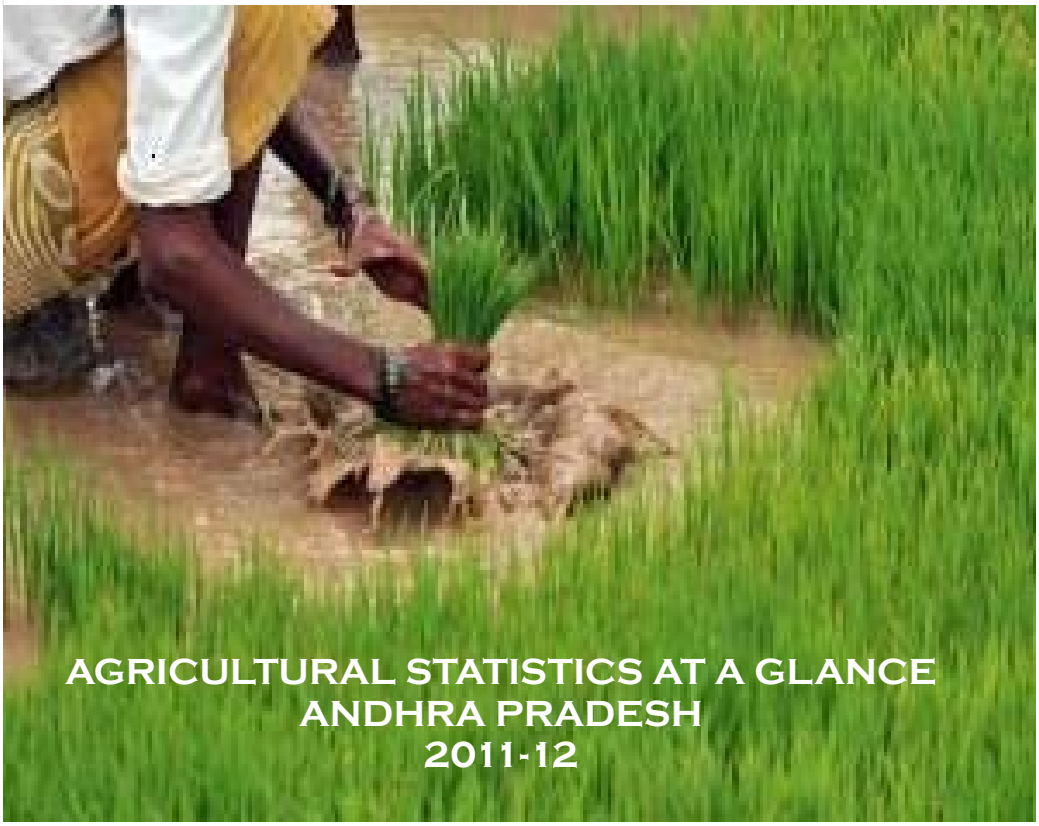
AGRICULTURAL STATISTICS AT A GLANCE
ANDHRA PRADESH 2011-12



The Role of Agricultural Sector in State Economy is very significant. The contribution of Agriculture, and Livestock under primary sector to the State Gross Domestic Product for the year 2011-12 is 17.72(as per updated advance). However, 62.17% of the working population is still dependent on Agriculture. Agriculture in Andhra Pradesh is mostly dependent on rainfall. Monsoon and Seasonal Conditions play a major role in the Agricultural production. The proportion of area under agriculture is 40.2% The Gross Irrigated Area is 49.31 % of Gross Area Sown in the State.

1. AREA AND SEASONAL CONDITIONS:

1.1 The seasonal conditions during the year 2011-12 on the whole were not satisfactory. During the South-West Monsoon period, the State received deficit rainfall of 14 % against normal. Even North-East monsoon periods Rainfall was deficit by 49%. as compared to normal rainfall. During the year 2011-12 an average rainfall of 720.4 mm was recorded as against the normal rainfall of 940.1 mm and thereby showing the deficit of 23%

SEASON-WISE RAINFALL IN ANDHRA PRADESH

2	RAYALASEEMA	714.1	652.6	(-) 8.61
3	TELANGANA	906.5	669.5	(-) 26.14
ANDHRA PRADESH		**940.1**	**720.4**	23.37

1.2 The Gross Area Sown in the State during 2011-12 is 137.60 Lakh Hectares as against 145.12 Lakh Hectares in 2010-11, showing a decrease of 5.2 %. The Net Area Sown in the State during the year 2011-12 is 110.51 Lakh Hectares as against 111.86 Lakh Hectares in 2010-11, showing an decrease of 1.2%.

1.3 The total production of Foodgrains in the State is 184.01 Lakh Tonnes in 2011-12 as against 203.14 Lakh Tonnes in 2010-11 recording a decrease of 9 %. The production of food grains in 2011-12 has substantially decreased due to inadequate and untimely rainfall and unfavourable seasonal conditions.

1.4 The Oilseeds production during 2011-12 was 23.31 Lakh Tonnes as against 30.74 Lakh Tonnes during 2010-11 registering an decrease of 24.17% , this is mainly due to decrease in productivity of Groundnut, Soyabean and Palmoil crops during Kharif and Rabi Seasons.

2. MONSOON 2011-2012

2.1 PRE-MONSOON RAINFALL:

During the month of May 2011, the state received an average rainfall of 33.4 mm. as against the normal rainfall of 52 mm, deficit being 36 percent. During this month the rainfall was excess in Mahabubnagar and Anantapur districts. Normal rainfall was recorded in Srikakulam, Vizianagaram, Visakhapatnam, Kadapa and Kurnool Districts and Deficit rainfall was recorded in East Godavari, West Godavari, Krishna, Prakasam, Chittoor, Rangareddy, Adilabad, Khammam and Nalgonda. Scanty rainfall was recorded in Guntur, Nellore, Hyderabad, Medak, Nizamabad, Karimnagar, and Warangal districts of the state.

SOUTH-WEST MONSOON PERIOD (JUNE to SEPTEMBER' 2011)

The Southwest monsoon has advanced over extreme Southern parts of Rayalaseema on 2nd June,2011 and covered over the districts of Ananthapur, Chittoor & Kadapa of Rayalaseema and Nellore district on 3 June2011. It is advanced over some parts of Telangana and Coastal Andhra Pradesh and remaining parts of Rayalaseems on 7th June,2011. Southwest monsoon has further advanced over some more parts North Coastal Andhra Pradesh on 13th and the remaining parts of Telangana and Coastal Andhra Pradesh on 15th June,2011 thus covered entire state of Andhra Pradesh .

During the month of June 2012 the State received an average rainfall of 67.6 mm. as against the normal rainfall of 108.4 mm, deficit being 38 percent. During the month of July 2011, the State received an average rainfall of 196.2 mm as against the normal rainfall of 188.7 mm, an excess being 4 percent. During the month of August 2011, the state received an average rainfall of 194.0 mm as against the normal rainfall of 184.4 mm, excess being 5 percent. During the month of September 2011, the state received an average rainfall of 81.6 mm as against the normal rainfall of 142.6 mm, deficit being 43 percent.

During the South West Monsoon **2011-12** the State received an average rainfall of 539.4 mm as against the normal rainfall of 624.1 mm, deficit being 14 percent. The rainfall was deficit in Prakasam, Anantapur, Rangareddy, Medak, Karimnagar and Nalgonda districts. Normal rainfall was received in the remaining 17 districts of the State.

2.3 NORTH EAST MONSOON (October to December, 2011):

The South West monsoon has withdrawn from Andhra Pradesh on 24-10-2011. Simultaneously North East monsoon rains have commenced over Rayalaseema Coastal Andhra Pradesh and Telangana.

During the month of October'2011 the state received an average rainfall of 66.9 mm. as against the normal rainfall of 138.4 mm, deficit being 52 percent. During the month of November'11, the state received an average rainfall of 36.7 mm as against the normal rainfall of 69.1 mm. deficit being 47 percent. During the month of December'11 the state received an average rainfall of 9.8 mm. as against the normal rainfall of 16.8 mm, deficit being 42 percent.

During the North East monsoon 2011, the average rainfall received was 113.4 mm., as against the normal rainfall of 224.3 mm, deficit being 49 percent. The normal rainfall was received in Nellore, Chittoor and Kadapa districts , deficit rainfall was recorded in Prakasam, Ananthapur, Kurnool and Hyderabad districts and scanty rainfall was received in the remaining 16 districts of the state.

2.4 WINTER PERIOD: (January 2012 and February 2012)

During the winter period 2012 the average rainfall received was 17.9 mm, as against normal rainfall of 13.9 mm, excess being 29 percent.

2.5 HOT WEATHER PERIOD: (March 2012 to May 2012)

During the Hot weather period 2012 the average rainfall received was 49.7 mm, as against normal rainfall of 77.8 mm, deficit being 36 percent.

2.6 ANNUAL RAINFALL 2011-2012:

During the year 2011-2012 the average rainfall received was 720.4 mm, as against normal rainfall of 940.1 mm, deficit being 23 percent. The Normal rainfall was received in Krishna, Nellore, Chittoor, Kadapa, Ananthapur and Nizamabad districts. Deficit rainfall was received in the remaining 17 districts of the State.

ANDHRA PRADESH

3. LAND USE STATISTICS:

Out of the total Geographical Area of 275.04 lakh hectares in the State, Net Area Sown including Fish Culture was 111.60 lakh hectares and constituted 40.6 % and area under Forest was 62.30 lakh hectares and accounted for 22.7 %.

During the year 2011-12 the Net Area Sown (including Fish Culture) is decreased to 111.60 lakh hectares from 112.88 lakh hectares in 2010-11 showing a decrease of 1.13 %. The details of Land Utilisation Statistics of Andhra Pradesh are given in Table-I. **TABLE-1**

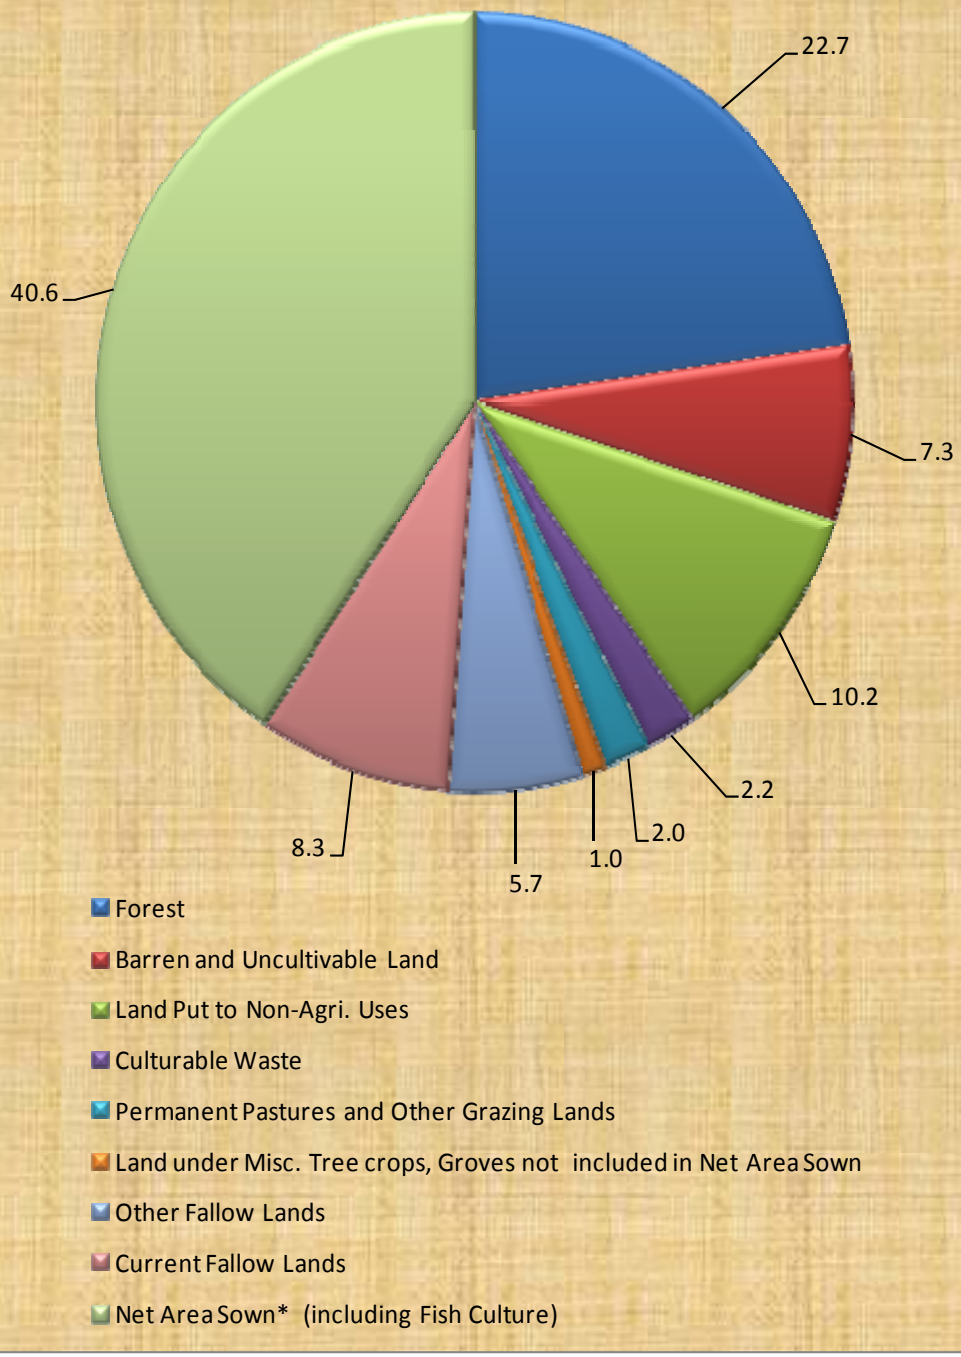
LAND UTILISATION IN ANDHRA PRADESH 2011-12

SL. NO.	CATEGORY	AREA (in Lakh Hectares}	PERCENTAGES TO TOTAL GEOGRAPHICAL AREA
(1)	(2)	(3)	(4)
1	Total Geographical Area	275.04	100.0
2	Forest	62.30	22.7
3	Barren and Uncultivable Land	20.24	7.3
4	Land Put to Non-Agri. Uses	28.03	10.2
5	Culturable Waste	6.14	2.2
6	Permanent Pastures and Other Grazing Lands	5.52	2.0
7	Land under Misc. Tree crops, Groves not included in Net Area Sown	2.89	1.0
8	Other Fallow Lands	15.59	5.7
9	Current Fallow Lands	22.73	8.3
10	Net Area Sown* (including Fish Culture)	111.60	40.6

*Net Area Sown under i) Crops is 110.52 lakh ha ii) Fish Ponds 1.08 lakh ha.

District-wise Land Utilization Particulars for the year 2011-2012 in Andhra Pradesh are presented in Annexure-III.

LAND UTILISATION IN ANDHRA PRADESH
(in percentage) 2011-2012



4. AGRICULTURAL PRODUCTION – 2011-12

The Food grain production in 2011-12 is 184.01 lakh tones as against 203.14 lakh tones in 2010-11 showing a decrease of 9.42 %. Broad details of the food grains production are given in the following Table-2.

TABLE – 2
FOODGRAINS PRODUCTION IN ANDHRA PRADESH
(Production in Lakh Tonnes)

SL. NO	ITEM	2011-12			2010-2011		
		KHARIF	RABI	TOTAL	KHARIF	RABI	TOTAL
(1)	(2)	(3)	(4)	(5)	(3)	(4)	(5)
1	Cereals & Millets	103.05	68.68	171.73	94.17	94.57	188.74
2	Pulses	2.73	9.56	12.29	4.35	10.05	14.40
3	Total Foodgrains	105.78	78.24	184.02	98.52	104.62	203.14

The Gross cropped area during 2011-12 is 137.60 lakh hectares as against 145.12 lakh hectares in 2010-11, showing a decrease of 5.19 %.

The area brought under food crops during 2011-12 is 90.85 lakh hectares as against 97.33 lakh hectares in 2010-11, the decrease being 6.66 %. The area under non-food crops is also decreased to 46.75 lakh hectares as against 47.79 lakh hectares in 2010-11,showing a decrease of 2.18 %.

TABLE-2 (a)
AREA UNDER FOOD AND NON-FOOD CROPS IN ANDHRA PRADESH
(Area in lakh hectares)

SL. NO	ITEM	2011-12			2010-2011		
		KHARIF	RABI	TOTAL	KHARIF	RABI	TOTAL
(1)	(2)	(3)	(4)	(5)	(3)	(4)	(5)
1	Cereals & Millets	36.04	17.55	53.59	35.92	23.06	58.98
2	Pulses	7.08	12.22	19.3	9.89	11.42	21.31
3	Total Food grains	43.12	29.77	72.89	45.81	34.48	80.29
4	Total food crops	57.29	33.56	90.85	58.96	38.37	97.33
5	Total non-food crops	39.9	6.85	46.75	40.17	7.62	47.79
6	Gross Area sown	97.19	40.41	137.6	99.13	45.99	145.12

4.1 CROPPING INTENSITY:

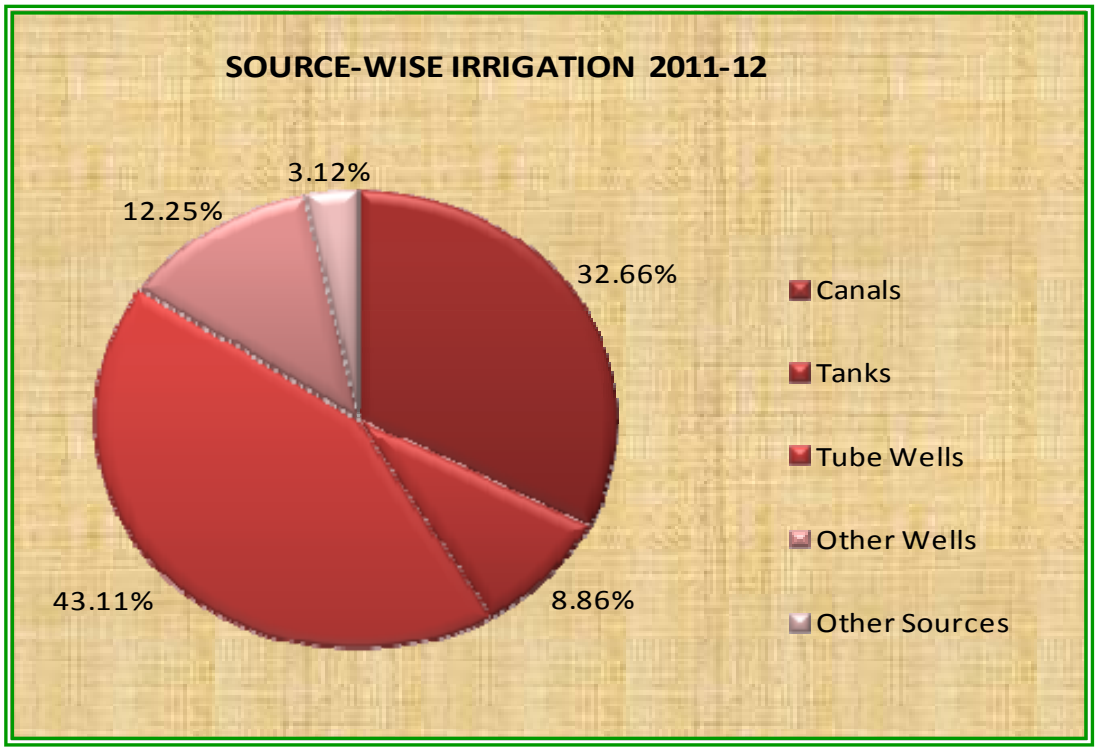
Cropping intensity is one of the indices for assessing the efficiency of agriculture sector. The cropping intensity i.e. the ratio of gross area sown to net area sown is 1.24 in 2011-2012 and it was 1.29 during 2010-11. The level of cropping intensity moves in consonance with the behaviour of the monsoon and availability of irrigation water.

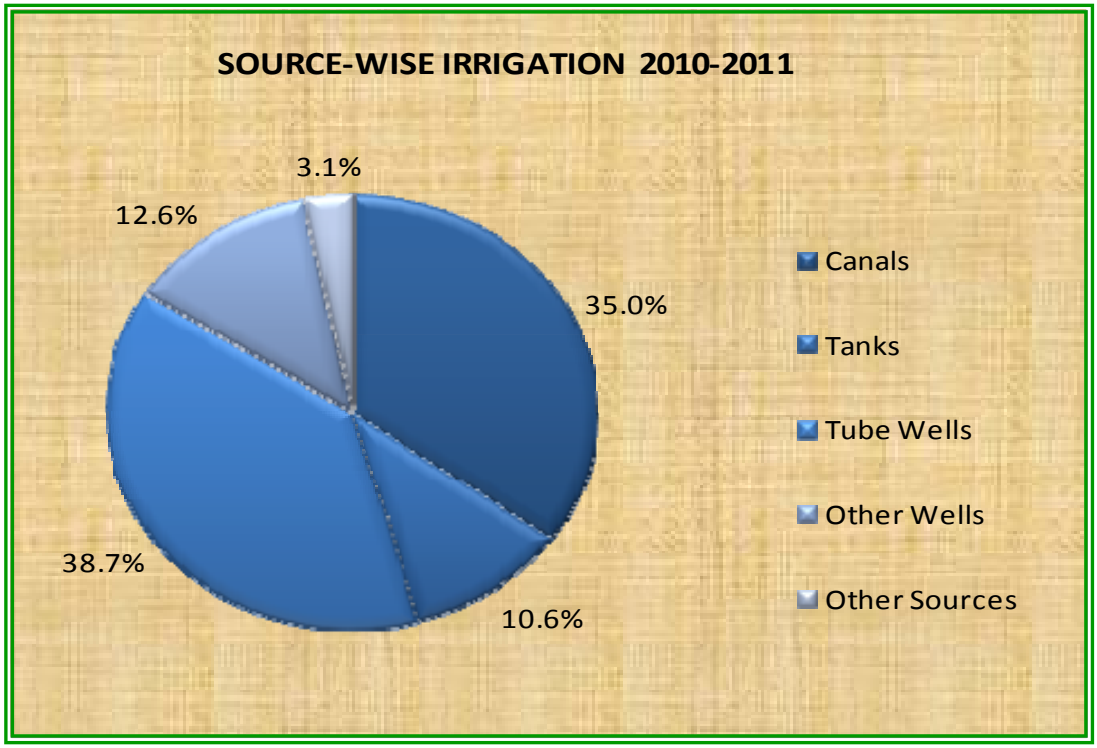
5. IRRIGATION :

The Gross Area irrigated by all sources during the year 2011-12 is 67.85 lakh hectares. This accounted for 49.30 % of the gross cropped area as against 49.29 % during 2011-12. Source-wise gross area irrigated for the years 2011-12 and 2010-11 is given in Table-3.

SL. NO.	SOURCE OF IRRIGATION	GROSS IRRIGATED AREA (*in Lakh Hectares*)			
		2011-12	% OF TOTAL GROSS AREA IRRIGATED	2010-2011	% OF TOTAL GROSS AREA IRRIGATED
(1)	(2)	(3)	(4)	(3)	(4)
1	Canals	22.16	32.66	25.03	35.0
2	Tanks	6.01	8.86	7.55	10.6
3	Tube Wells	29.25	43.11	27.69	38.7
4	Other Wells	8.31	12.25	9.03	12.6
5	Other Sources	2.12	3.12	2.23	3.1
Total		**67.85**	**100.00**	**71.53**	**100.00**

SOURCE - WISE IRRIGATION IN ANDHRA PRADESH
2011-2012 AND 2010-2011





5.1 The Gross Area irrigated in the State during the year 2011-12 is decreased to 67.85 Lakh hectares from 71.53 lakh hectares in 2010-11, the decrease being 5.14 % and the decrease is reflected under all sources of irrigation except Tube wells. The Net Area Irrigated for 2011-12 is slightly increased to 50.89 lakh hectares from 50.34 lakh hectares in 2010-11, the increase being 1.09 %.

5.2 The details of Net Area irrigated by different sources of irrigation during the last 5 years for the State as a whole are presented in Annexure-V. Source-Wise and District-Wise Gross Area Irrigated, Area Irrigated more than once and Net Area Irrigated details are presented in Annexure-VI.

5.3. Out of Gross Area irrigated of 67.85 lakh hectares 58.62 % was accounted by Rice alone and followed , 6.28 % by Maize , 5.54 % by Cotton, 5.18 % by Sugarcane , 4.22 % by Groundnut and 3.38 % by Chillies respectively. The remaining irrigated area was covered by other crops. The particulars of Crop-wise Area Irrigated by different sources in respect of some important crops are presented in Annexure-VII.

5.4. IRRIGATION INTENSITY:

The Irrigation intensity i.e. the ratio of Gross Irrigated Area to Net Irrigated Area is 1.33 in 2011-12, where as it was 1.42 in 2010-11.

6. FOODGRAIN CROPS:

6.1.1 AREA AND PRODUCTION OF FOOD GRAIN CROPS :

Rice and Jowar are the staple food grain crops which together accounted 59.99% of the total area under food grain crops during 2011-2012.

TABLE - 4

AREA UNDER FOODGRAIN CROPS IN ANDHRA PRADESH

Area in Lakh Hectares

SL. NO	ITEM	2011-2012			2010-2011		
		KHARIF	RABI	TOTAL	KHARIF	RABI	TOTAL
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1	Cereals & Millets	36.04	17.55	53.59	35.92	23.06	58.98
2	Pulses	7.08	12.22	19.30	9.89	11.42	21.31
3	Total Food grains	43.12	29.77	72.89	45.81	34.48	80.29

The area under food grains is 72.89 lakh hectares during 2011-12 as against 80.29 lakh hectares in 2010-2011. This decrease of 9.22 % was attributed to decrease in area under Cereals &Millets as well as Pulses during 2011-2012. The decrease in area under crops is due to non receipt of sufficient water in Irirgation sources and untimely and inadequate Rainfall in the South- West Monsoon and North-East Mansoon. Periods. The Area and Production of food grains in the State for the last five years are shown in

SL.NO.	YEAR	AREA *(IN LAKH HECTARES)*			PRODUCTION *(IN LAKH TONNES)*

6.1.3: AREA UNDER TOTAL CEREALS & MILLETS:

The area under cereals & millets is decreased by 5.39 lakh hect. in 2011-12 and the area under pulses decreased by 2.01 lakh hect in 2011-12 when compared with that of 2010-11 figures.

6.1.3(a) AREA UNDER KHARIF FOOD GRAINS:

The area under food grains in kharif 2011-12 was 43.12 lakh hectares as against 45.81 lakh hectares in 2010-2011 showing a decrease of 5.87 per cent.

6.1.4 AREA UNDER RABI FOOD GRAINS:

The area under foodgrains in Rabi 2011-12 was 29.77 lakh hectares as against 34.48 lakh hectares in 2010-2011 , showing a decrease of 13.66 %.

6.1.5. FOOD GRAINS PRODUCTION:

The Total food grains production in the State is estimated to 184.02 lakh tonnes in 2011-12 as against 203.14 lakh tones in 2010-2011 . The production under food grains during 2011-2012, is decreased by 9.41 % compared to previous year.

The season-wise and crop-wise production under foodgrains during 2011-12 and 2010-2011 is shown in **Table-6.**

N = NEGLIGIBLE

6.1.6 KHARIF FOODGRAINS PRODUCTION:

The Kharif Food grains production is estimated at 105.78 lakh tonnes in 2011-2012 as against 98.52 lakh tonnes in 2010-2011, registering an increase of 7.37 % due to increase in productivity of Food grain crops.

6.1.7 RABI FOODGRAINS PRODUCTION:

The production of Food grains during Rabi 2011-2012 is decreased to 78.24 lakh tonnes from 104.62 lakh tonnes in 2010-2011, showing a decrease of 25.22 % when compared to previous year.

The decrease of production in food grains is caused due to decrease in area of Paddy and productivity of Bajra, Maize, Bengalgram and Redgram crops.

6.1.8 PRODUCTIVITY OF FOODGRAINS:

The productivity of food grain crops in 2011-2012 and 2010-2011 are given in Table-7.

6.1.9 DISTRICT-WISE AREA AND PRODUCTION OF FOOD GRAINS:

District-wise Area and Production of food grains are presented in Annexure-VIII and Crop-wise, District-wise Area, Production and Productivity are presented in Annexure-IX.

6.2.0 R I C E:

Rice, the Major Staple food grain crop, which is predominantly irrigated, is grown in both Kharif and Rabi seasons in all the districts of the state. It accounted for 29.77 % of the total cropped area in the state during 2011-2012. The details of Area, Production and Productivity per hectare of Rice crop during the last five years are given in Table-8.

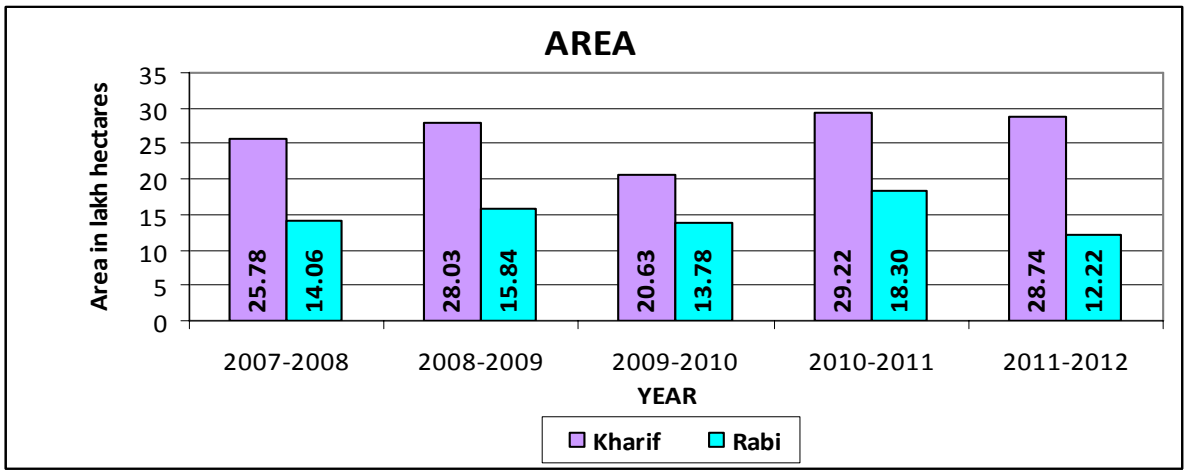
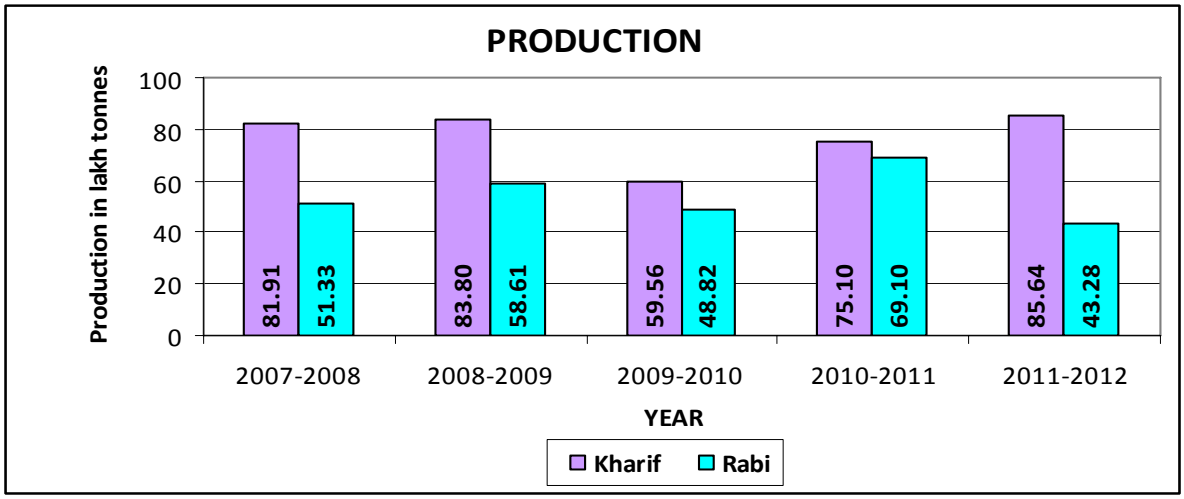
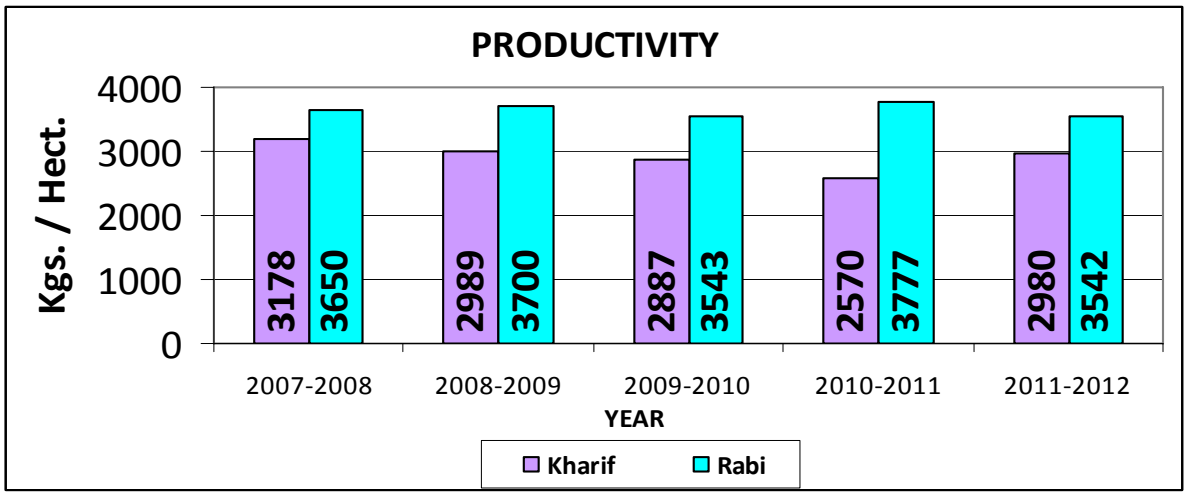
AREA, PRODUCTION AND PRODUCTIVITY OF RICE IN ANDHRA PRADESH FROM 2007-2008 TO 2011-2012







6.2.1. J O W A R :

Next to Rice, Jowar is the principal foodgrain crop in the state which is sown in both Kharif and Rabi seasons mostly under rainfed conditions. The area under Jowar is 2.77 lakh hectares in the state. This crop is predominantly grown in the districts of Kurnool, Mahabubnagar, Medak ,Adilabad and Guntur which to-gether account for 72.83% of the total area in the state. The area, production and productivity of Jowar during the last five years are shown in Table-9.

TABLE-9

AREA, PRODUCTION AND PRODUCTIVITY OF JOWAR FROM 2007-2008 TO 2011-2012 IN ANDHRA PRADESH

SL. NO.	YEAR	AREA (IN LAKH HECTARES)			PRODUCTION (IN LAKH TONES)			PRODUCTIVITY (IN KGS/HECTARES)

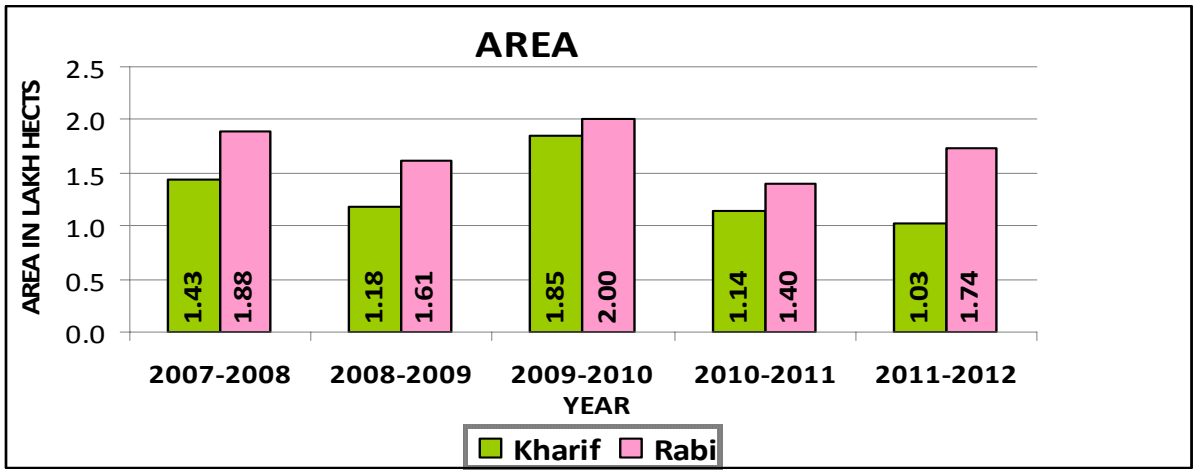
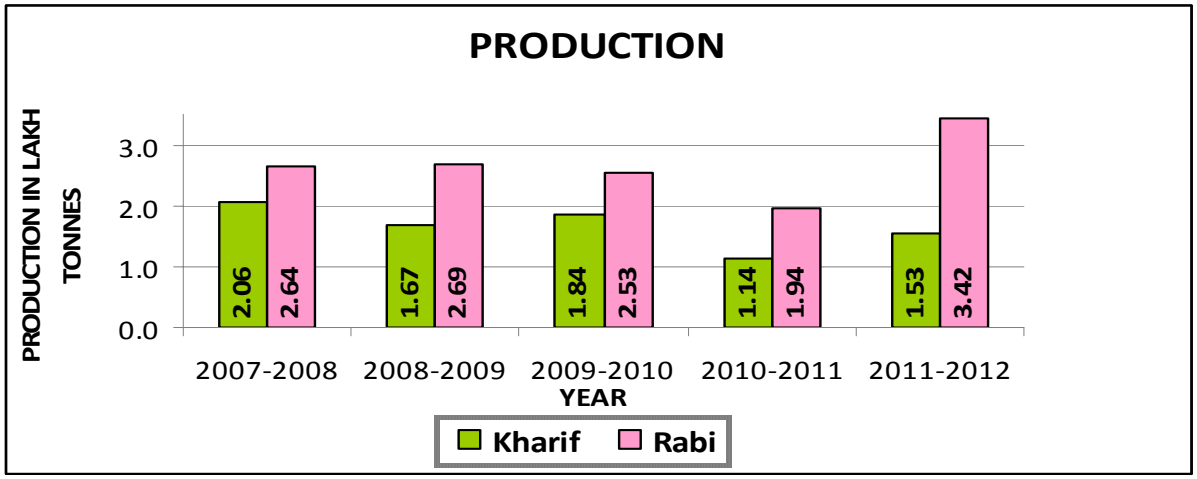
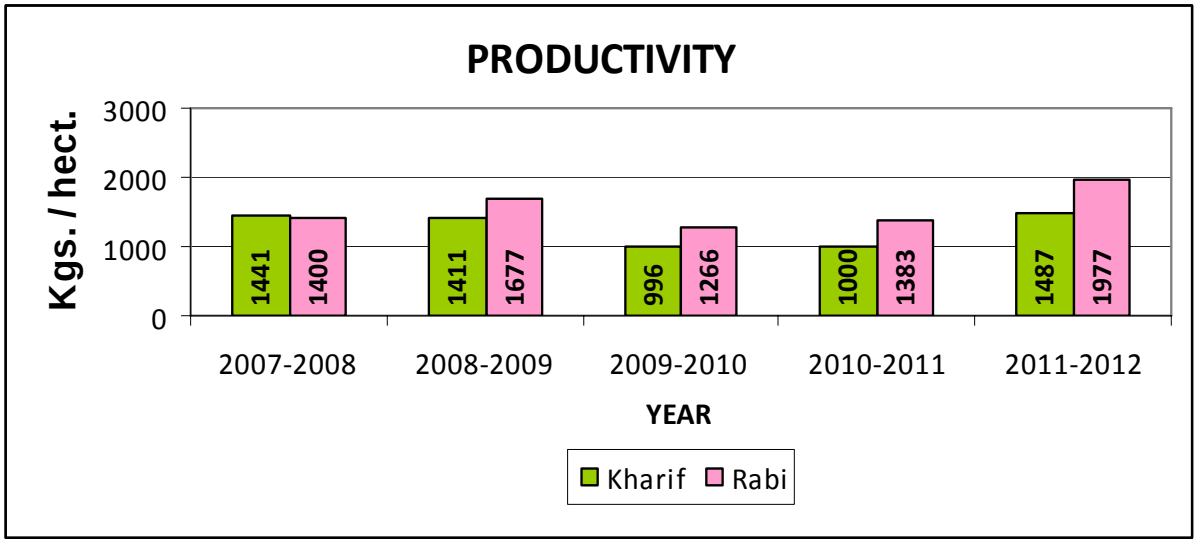
AREA, PRODUCTION AND PRODUCTIVITY OF JOWAR
IN ANDHRA PRADESH FROM 2007-2008 TO 2011-2012







6.2.2 B A J R A:

Bajra crop is predominantly grown in the districts of Prakasam, Nizamabad, Kurnool, , Visakhapatnam and Y.S.R.Kadapa which together accounted for 72.34 % of the total area in the state during 2011-2012 . The Area, production and productivity of Bajra during the last five years are shown in Table-10.

TABLE-10

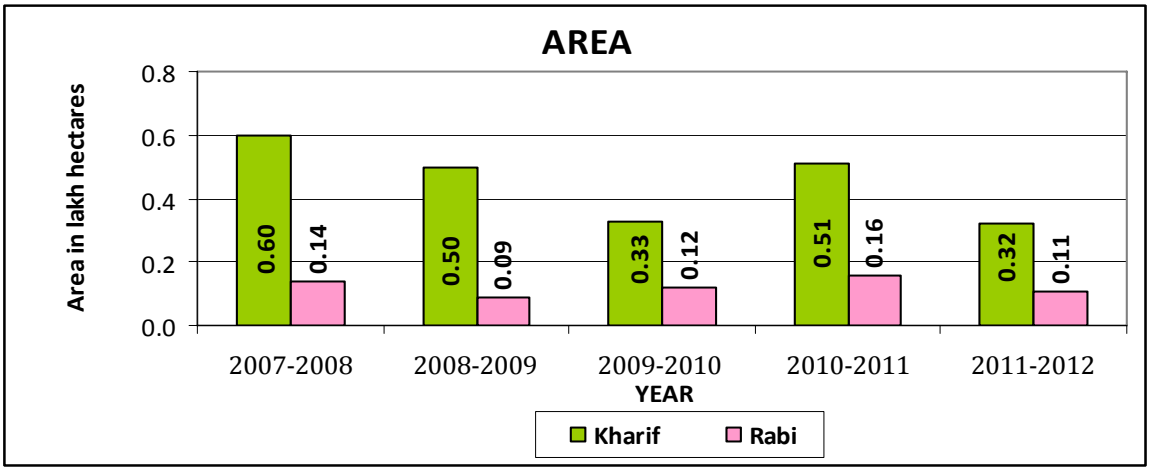
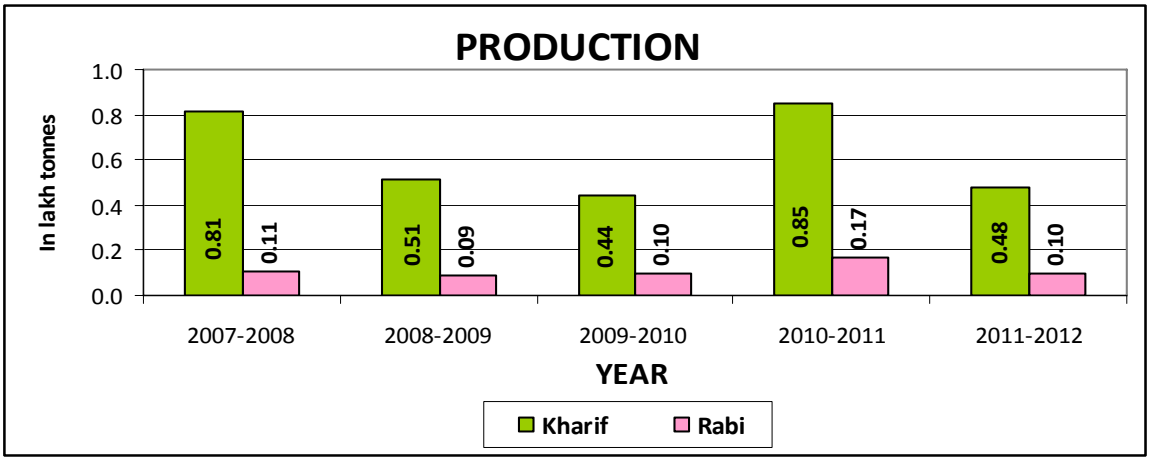
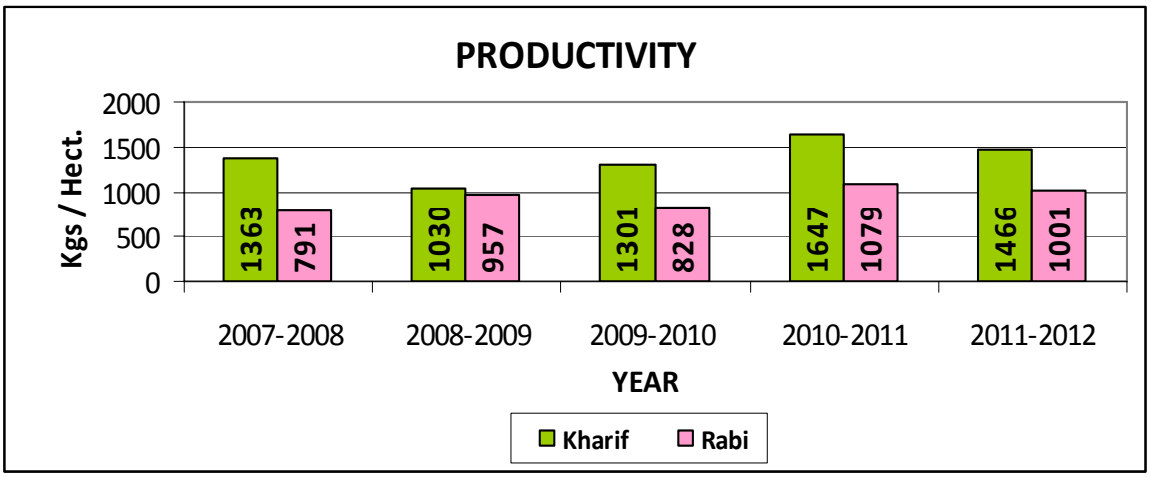
AREA, PRODUCTION AND PRODUCTIVITY OF BAJRA IN ANDHRA PRADESH FROM 2007-2008 TO 2011-2012







6.2.3 R A G I :

Ragi crop is grown in both Kharif and Rabi seasons in the state. Around 91.88 % of the total area under this crop in the state, predominently grown in Visakhapatnam, Chittoor, Anantapur ,Vizianagaram and Mahabubnagar districts during Kharif 2011-12. The details of area crop production and productivity of Ragi crop are given in Table-11.

TABLE-11

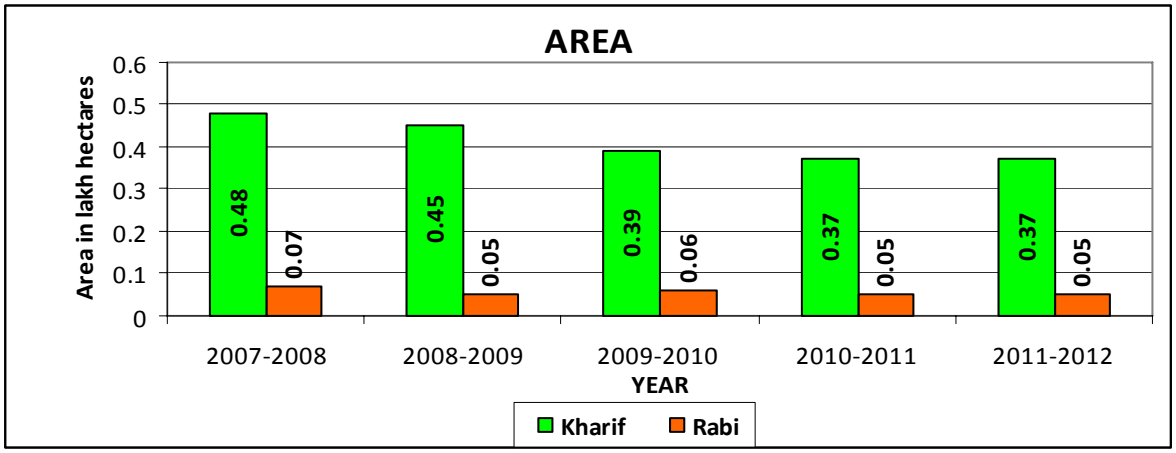
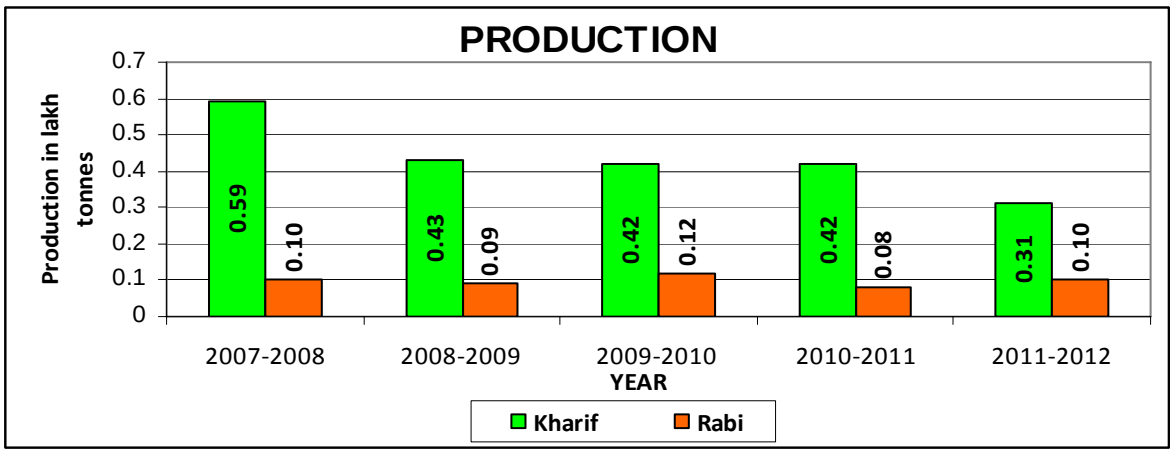
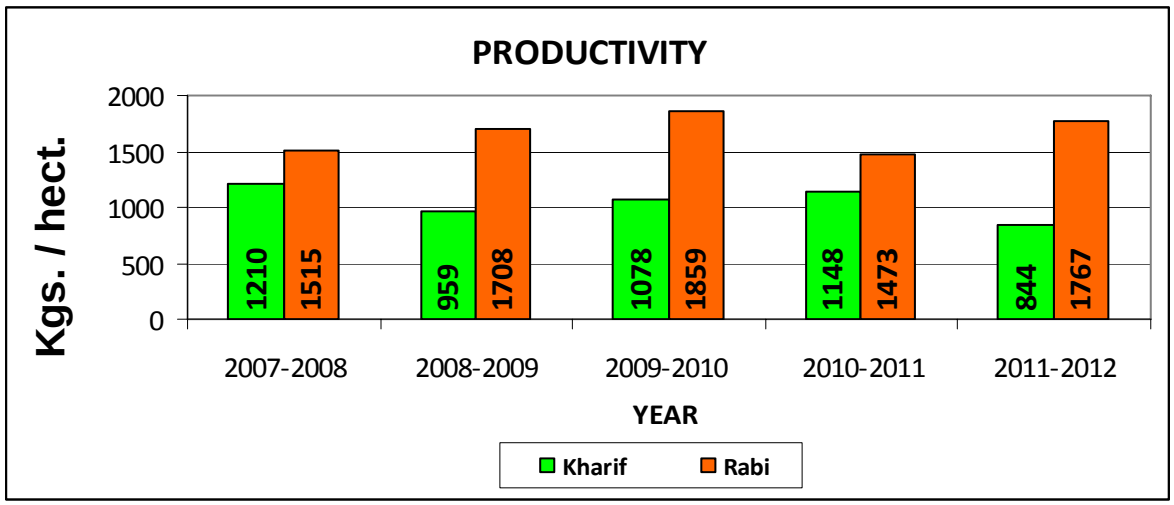
AREA, PRODUCTION AND PRODUCTIVITY OF RAGI IN ANDHRA PRADESH FROM 2007-2008 TO 2011-2012







6. 2. 4 M A I Z E :

This crop is mostly grown in Telangana region of the state. The districts of Mahaboobnagar, Medak, Karimnagar, Nizamabad, Guntur, and Warangal are predominantly growing this crop which accounted for 66.86 % of the total area under the crop in the state during 2011-2012.The Table showing the area, production and productivity of Maize crop from 2007-2008 to 2011-2012 are given in Table-12.

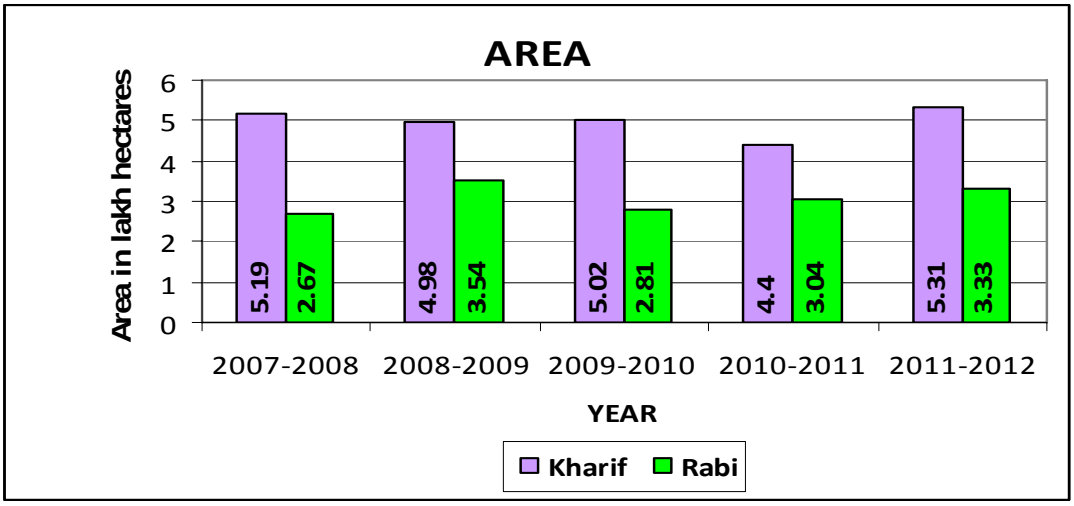
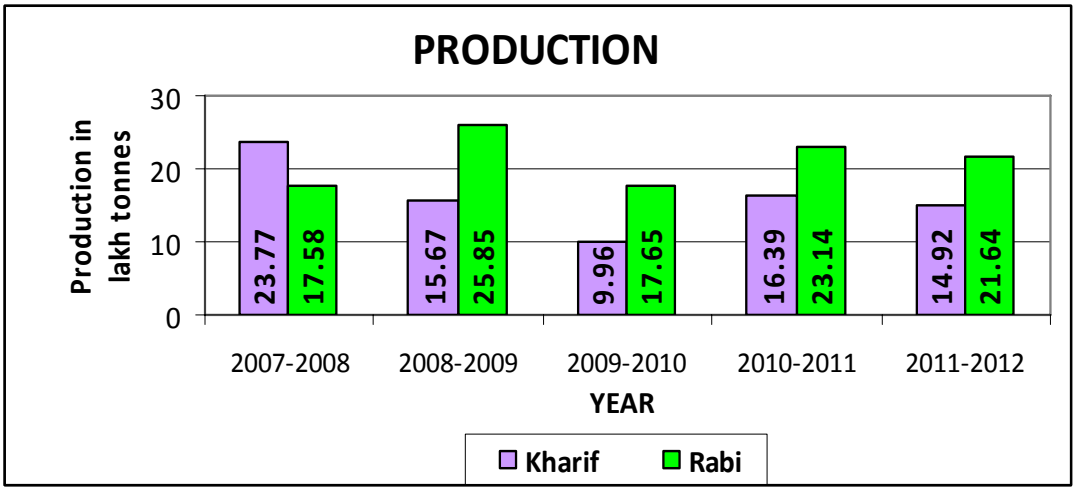
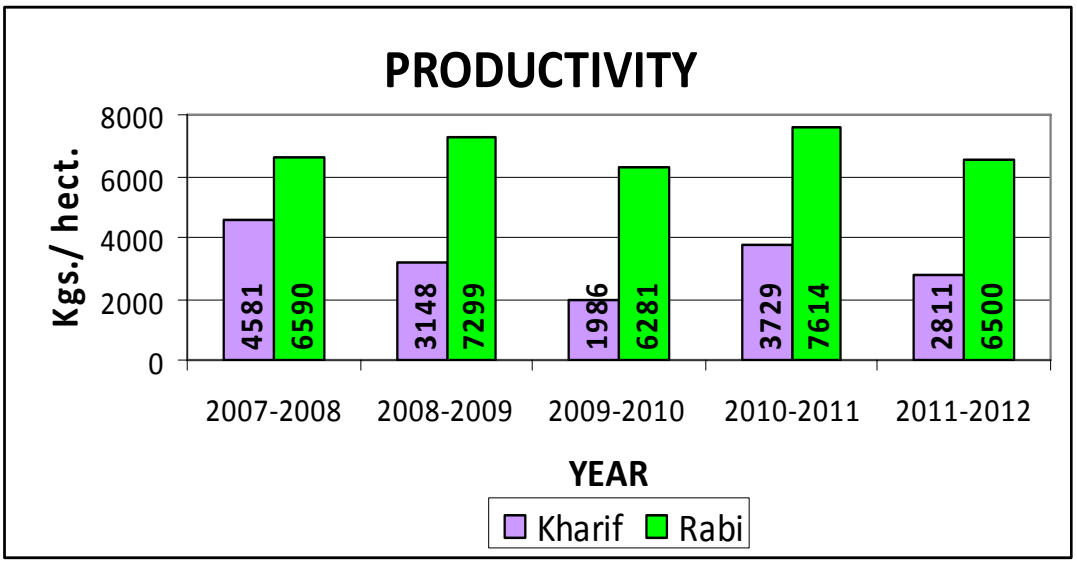
AREA, PRODUCTION AND PRODUCTIVITY OF MAIZE IN ANDHRA PRADESH FROM 2007-2008 TO 2011-2012







6.2.5. P U L S E S :

Redgram, Bengalgram, Greengram, Blackgram and few other pulses are raised in the state. Redgram and Bengalgram are mostly confined to Kharif and Rabi seasons respectively, while the remaining pulses are grown both in Kharif and Rabi seasons. The area under these pulses accounted for 14.03 % of the total cropped area in the state during 2011-2012 . Out of 12.29 lakh tones of production of pulses produced in the state during 2011-12 . The production under Redgram, Bengagram, ,Greengram and Blackgram alone accounted for 97.33 % of the total production of pulses. The area, production and productivity of pulses for the last 5 years are given Table-13.

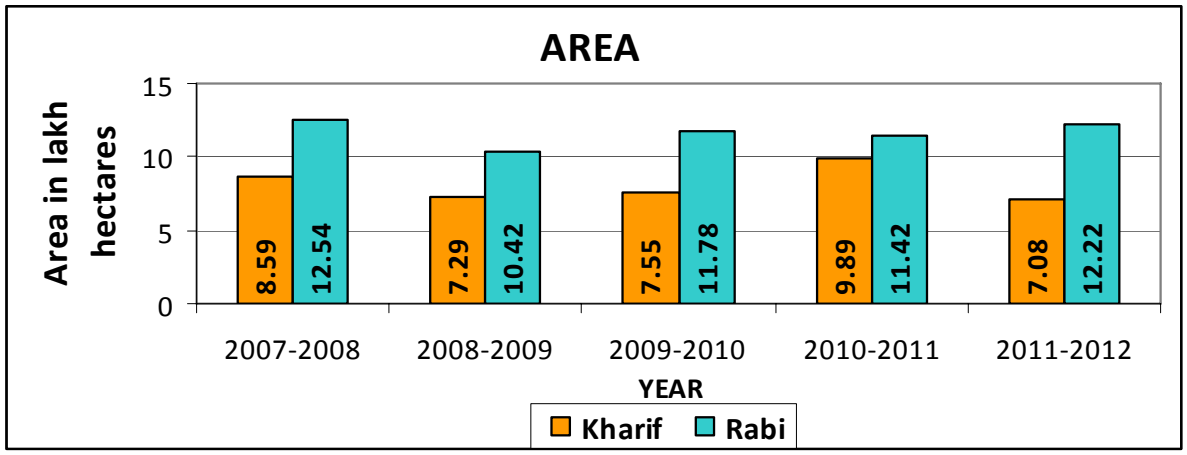
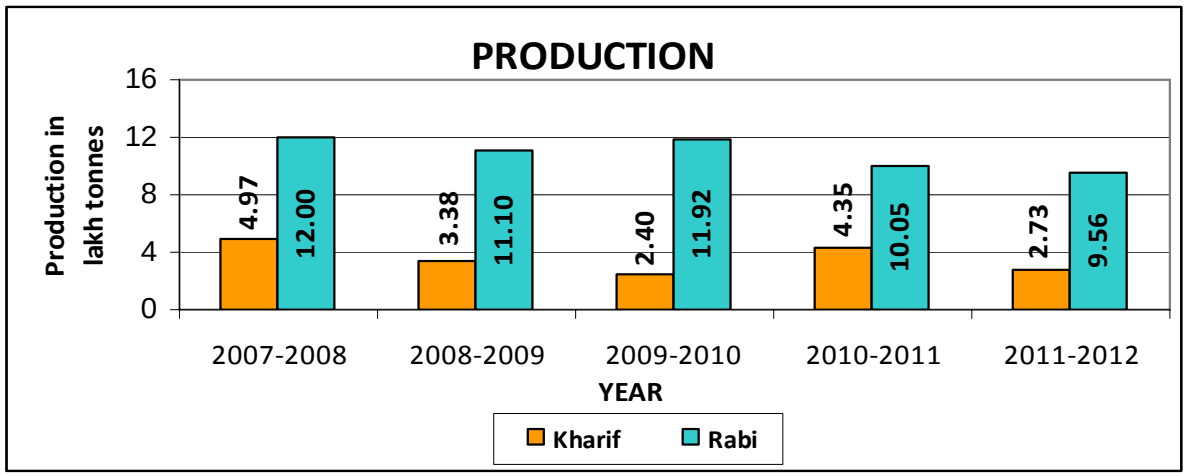
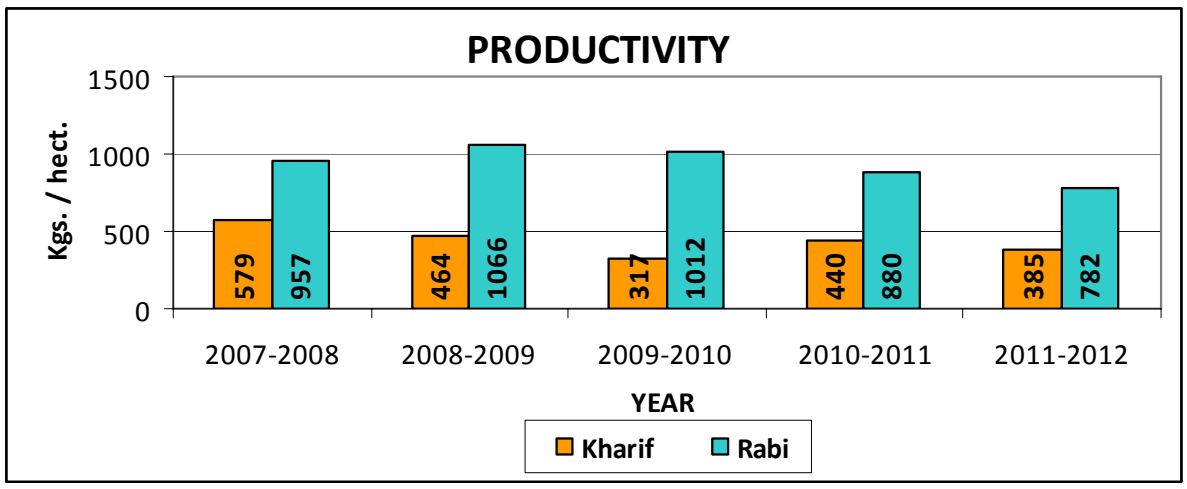
AREA, PRODUCTION AND PRODUCTIVITY OF
TOTAL PULSES IN ANDHRA PRADESH FROM 2007-08 TO 2011-12







6.2.6 FRUITS AND VEGETABLES:

The contribution from Horticulture sector to State Gross Domestic Product is substantially increased. The commercial value and consumption of Fruits and Vegetable are also increasing from year to year. In order to estimate the yield and production of certain important Fruits and Vegetables, Yield estimation surveys on 12 fruits and vegetable crops are being conducted every year. The crops covered under yield estimates are i) Mango ii) Coconut iii) Cashewnut iv) Lemon v) Batavia vi) Banana vii) Guava viii) Tomato ix) Onion x) Bhendi xi) Brinjal and xii)Turmeric. The Area, Production and Productivity of these crops at the State level from 2007-2008 to 2011-2012 are presented in Table-14.

6.2.7 OIL SEEDS :

Andhra Pradesh is one of the important states in the country to grow oil seed crops like Groundnut, Sunflower and Castor extensively.

The area under oil seeds excluding Coconut Crop during 2011-2012 was 19.94 Lakh hectares which constituted 14.49 % of the total cropped area in the state. The area under Groundnut alone accounted for 65.55 % of the total area under oil seeds during 2011-12. Out of 23.31 lakh tonnes of production of oil seeds, Palm oil, Groundnut, Soyabean and Sunflower accounted for production of 95.71 % of the total oil seed production in the state. The Area, Production and Productivity for the last five years are given in the Table -15.

* Gur production is arrived from cane production basing on cane to Gur conversion ratio provided for SC(P) (10.02%) and SC(R)(10.24%).

6.2.9 A BRIEF NOTE ON VILLAGE INSURANCE SCHEME:

The Village Insurance scheme is an innovative and first of its kind in Andhra Pradesh. Andhra Pradesh is the pioneer State in India which is implementing the project with Village as an Insurance Unit.

The scheme was initiated first during Kharif 2005 on pilot basis in 5 Districts Viz., Prakasam, Kadapa, Ananthapur, Mahabubnagar and Karimnagar and continued in Kharif 2006. During Kharif 2007, the scheme was extended to five more districts i.e. Vizianagaram, East Godavari, West Godavari, Kurnool and Medak Districts.

The Government of Andhra Pradesh considering interest and demand from the farming community have decided to implement Village Insurance Scheme in the entire State (except Hyderabad) from Kharif 2008 onwards with one predominant crop existing in each District and continued till Kharif 2010. During Kharif 2011, the major predominant Groundnut crop in Rayalaseema Districts having brought under Weather Based Crop Insurance Scheme, the Village Insurance Scheme was implemented in 18 districts only. But during Kharif 2012, this scheme is going to be implemented in 22 districts by including 4 Rayalaseema districts taking 2nd predominant crop.

The Primary Workers for Village Insurance Scheme are Agriculture Extension Officers (A.E.Os) of Agriculture Department and the personnel appointed purely on contract basis.

A Village with an Area of minimum 100 Hectares under the selected crop is notified as an independent unit. If the area of the selected crop in a village is less than 100 Hectares, then contiguous village(s) / Mandal(s) were grouped to form an Insurance Unit. Insurance units are classified into 5 different categories according to the number of villages existing in the unit and experiments are conducted as per the category shown below.

Cate-gory code	Category Description	No of Experi-ments con-ducted
1	Single Village as a unit	4
2	More than one village but less than 6 villages	4
3	More than 5 villages but not entire mandal	10
4	Entire mandal	10
5	Group of Mandals	16

During Kharif 2011, 9,317 Insurance Units are constituted to conduct 41,264 experiments under three selected crops viz., Paddy, Maize and Soyabean and the details are given separately in Table I. The Planning details of Kharif 2012 are given in Table II.

The details of beneficiaries and compensation particulars under implementation of Village made as Insurance Unit Scheme from Kharif 2005-06 to Kharif 2010-11 and MNAIS Rabi 2010-11 are furnished below.

SL. NO	SEASON & YEAR	NO.OF FARMERS BENEFITED (IN LAKHS)	COMPENSATION PAID (IN CRORES)
1	Kharif 2005-06	6.61	493.35
2	Kharif 2006-07	6.65	540.25
3	Kharif 2007-08	0.13	6.94
4	Kharif 2008-09	12.67	790.14
5	Kharif 2009-10	9.25	594.01
6	Kharif 2010-11	7.18	733.88
7	Rabi 2010-11	0.01	0.61

Modified National Agricultural Insurance Scheme

As per instructions of the Govt. of India, Modified National Agricultural Insurance Scheme was introduced on pilot basis during Rabi 2010-11 in S.P.S.Nellore, Prakasam and Warangal districts and later extended to East Godavari during Rabi 2011-12. This scheme is going to be implemented during 2012-13 also. During Kharif 2012 East Godavari, West Godavari and Krishna districts are covered and during Rabi 2012-13 three other districts viz., SPS Nellore, Prakasam and Warangal are going to be covered. Rice crop was covered under 'Village made as Insurance Unit'. Apart from the yield loss, the following risks will be covered under this new scheme.

⇒ Prevented sowings/planting risk: In case farmer is prevented from sowing/planting due to deficit rainfall or adverse seasonal conditions, such insured farmer will get up to 25% of the sum insured.

⇒ Localized risks: Hailstorm, landslide, etc. localized risks will also be covered under the scheme.

⇒ Post harvest losses: The insurance coverage is available even after harvest of the crop up to a maximum of two weeks from the date of harvest.

⇒ The NAIS and MNAIS in a district are mutually exclusive.

- STEPS FOLLOWED TO PREPARE THE AVERAGES FOR THE ANN-X IN THE AGRICULTURE STATISTICS AT A GLANCE.

1. Crops in the category of OTHERS i.e. other fibers, other edible oil seeds and other green manure crops are added to the misc. non food crops as there are no new crops to give proportionate average area . This led to huge variation between the actual and average area of Misc. Non Food Crops.

- STEPS FOLLOWED TO PREPARE THE AVERAGES FOR THE ANN-X IN THE AGRICULTURE STATISTICS AT A GLANCE.

1. Crops in the category of OTHERS i.e. other fibers, other edible oil seeds and other green manure crops are added to the misc. non food crops as there are no new crops to give proportionate average area . This led to huge variation between the actual and average area of Misc. Non Food Crops.

ANNEXURE-37

AGRO CLIMATIC ZONES IN ANDHRA PRADESH

1. PYSIOGRAPHY:

Andhra Pradesh which is a part of the peninsular shield has the following three physiographic divisions.

1.1.Coastal Plains:

They comprise the coastal districts and extend to about 972 kms along the Bay of Bengal with varying width. The Eastern Ghats constitute their Western border.

1.2.Eastern Ghats:

These are mountainous tracts forming parts of the coastal districts. The Ghats are not continuous and high like the Western Ghats. The Eastern Ghats consist of several ranges – the papikonda range, the simhachal hill range, yarada hills, Nallamalla hills, papi hills, Seshachala hills and Horsley hills. The other hills ranges area the Sahyadri and Bhalghat hills in the eastern part of Telangana. Mahendragiri is the highest peak in Andhra Pradesh rising to a height of 1,500m above the mean sea level.

1.3.Pene Plains:

These plains extend to Telangana & Rayalaseema regions with the Eastern Ghats as their Eastern border & slopes towards the east.

2 .Geology:

A major portion of Andhra Pradesh constitutes a part of stable mass known as the peninsular shield of Indian sub continent formed about 4,000 million years ago. The shield is mostly Achaeans, the oldest geological group, though younger formations are also noticed in various parts. Hydro geologically, the three following litho-units are recognized in the state.

1. Consolidated hard rocks occupying 84% of the state comprising rocks of the Achaean age, lime stones, quantities of the Precambrian age and massive Deccan traps of the cretaceous Eocene ages.

2. Semi – consolidated sedimentary formations comprising Gondwanas, Infra and Inter – trappeans and Rajamundry sand stones.

3. Soft rocks include the UN consolidated alluvium, comprising river and coastal alluvium of sub resent age beds of clay, sand, gravel and boulders in the alluvium strata stretch all along the coast varying in thickness from a few meters to hundreds of meters.

3. Soils:

Red soils occupy about 65% of the state, while black soils account for about 25%. The alluvial soils of reverine & marine deposits occupy about 5% of the area. The others are coastal sands; laterite soils etc. Salt effected soils such as saline and alkaline soils constitute about 1% of the area. The soils affected by water logging & soil salinity are increasing under the major canal commands due to inefficient irrigation system and use. About 10% of the canal irrigated area is affected by water logging. A total of about 18.5 million hectares (19.6%) are reported to be subjected to soils degradation such as soil erosion, Salinization, alkanization, laterization and inundation.

4.Agro climatic Zones of Andhra Pradesh:

Andhra Pradesh is situated in a tropical region between $12^0\ 37^1$ and $19^0\ 54^1$ N latitudes and 76^0 46′ and 84^0 46′ E longitudes. It has 972 kms of coastal line. The state divided into 23 districts and these are grouped into three broad administrative regions- Coastal Andhra, Rayalaseema and Telangana as given below

Coastal Andhra Region:	Srikakulam,Vizayanagaram,Visakapatnam, East Godavari, West Godavari, Krishna.Guntur, Prakasam and S.P.S. Nellore.(9 districts)
Rayalaseema Region:	Anantapur,Chittoor,YSR (Kadapa)and Kurnool.(4districts)
TelanganaRegion:	Mahaboobnagar, Medak, Nizamabad, Adilabad, Karimnagar, Warangal, Khammam, Nalgonda, Rangareddy and Hyderabad (10 districts)

Based on the amount and distribution of rain fall , the state has been divided into 9 Agro-climatic zones:1) Krishna Zone,2)Godavari Zone,3) North coastal Zone, 4) Southern Zone,5) Scarce rain fall Zone,6) Northern Telangana Zone, 7)Central Telangana Zone,8) Southern Telangana Zone and 9)High Altitude & Tribal Zone

1.North Coastal zone:

This one comprises most of Srikakulam, Vizayanagaram and Visakapatnam districts (excluding tribal hill areas) and upland areas of East Godavari district. The annual normal rain fall is 1000- 1100mm and the maximum and minimum temperatures during the south west monsoon range from 33 ^{0} C to 35 ^{0} C and 26 ^{0} C to 27 ^{0} C , respectively. The soils are predominantly red with clay base. There are small patches of acidic laterite soils with pH 4.0 to 5.0.

2.Godavari zone:

This zone comprises of west and East Godavari (excluding up lands) districts and receives a normal rain fall of 1000-1200 mm. The maximum and minimum temperatures during south west monsoon period range from 32 ^{0}C to 36 ^{0}C and 23 ^{0}C to 24 ^{0}C respectively. Alfisols, vertisoils and Entisoils are prevalent in this zone.

3.Krishna zone:

This zone consists of the districts of Krishna, Guntur and Prakasam. This zone receives an annual normal rainfall of 800-1100mm. The maximum temperature during south west monsoons period range from 32 ^{0}C to 36 ^{0}C . Respectively. The important soil groups are deltaic alluvium, red soils with clay base, black cotton soils, red loamy, coastal sands and saline soils.

4.Southern zone:

This zone includes the districts of Nellore, Chittoor and YSR(Kadapa) districts. The average annual normal rain fall ranges from 600 to 1000mm with grea'er share during north east monsoon. The maximum and minimum temperatures during south west monsoon ranges from 36 ^{0}C to 40 ^{0}C and 23 ^{0}C to 25 ^{0}C , respectively. The soils are red loamy which are shallow to moderately deep.

5.Northern Telangana zone:

This zone includes the districts of Adilabad, Karimnagar and Nizamabad.The annual normal rain fall is 900 to 1150mm mostly from south west monsoon. The maximum and minimum temperatures during south west monsoon range from 32 ^{0}C to 37 ^{0}C and 21 ^{0}C to 25 ^{0}C Respectively. Red soils are predominant in the zone which includes chalkas, red sands and deep red loams. Very deep black cotton soils are seen in the zone.

6.Central Telangana zone:

This zone includes the districts of Medak, Warangal and Khammam districts and it receives an annual normal rain fall of 800-1150 mm. The maximum and minimum temperatures during south west monsoon range from 22 ^{0} C to 37 ^{0} C and 21 ^{0} C to 25 ^{0} C . Respectively. Red soils are predominant in the zone which includes chalkas, red sands and deep red loams. Very deep black cotton soils are also seen in the zone.

7.Southern Telangana zone:

This zone comprises of the districts of Rangareddy, Mahaboobnagar and Nalgonda.The annual normal rain fall is 600 -780 mm. The maximum and minimum temperatures during south west monsoon range from 28 ^{0} C to 34 ^{0} C and 22 ^{0} C to 23 ^{0} C , respectively. This zone is a predominantly red soil tract having red with loamy sub-soil i.e., chlakas.

8.Scarce rainfall zone:

This zone includes the districts of Kurnool and Ananthapur. The annual normal rain fall range from 500 to 670 mm. The maximum and minimum temperatures during south west monsoon range from 32 ^{0} C to 36 ^{0} C and 24 ^{0} C to 30 ^{0} C .respectively. The important soil groups are red earths with loamy soils i.e., chalkas and red soils. Black cotton soils are also seen in some pockets.

9.High Altitude and Tribal zone:

This zone consists of the areas along the northern borders of the state in the districts of Srikakukalm, Vizayanagaram, Visakapatnam, East Godavari and Khammam. These areas are inhabited by tribals. The annual normal rainfall is over 1400mm and large areas at high altitudes up to 1000mm above mean sea level. The important soils red sandy loams and red loams with clay base with very small patches of alluvial soils. The maximum and minimum temperatures during south west monsoon range from 29 ^{0} C to 34 ^{0} C and 13 ^{0} C to 27 ^{0} C respectively.

Sl.No.	Name of the zone	Districts	Soil type	Important crops grown	Normal Rain fall (in mm)
1	2	3	4	5	6
1	North coastal Zone	Srikakulam Vizayanagaram Visakapatnam	Deltaic Al-luvium, Red soils with clay, BC soils, Red loams, coastal sands, sa-line soils.	Rice, cashewnut, Groundnut, Cocnut, Mango,Mesta.Ragi, Sugarcane	1000-1100
2	Godavari Zone	East Godavari West Godavari	Red soils with clay base, pockets of acidic soils, laterite soils, soils with pH4-5.	Rice,Coconut,Cashewnut, Mango, Sugarcane	1000-1200
3	Krishna Zone	Krishna,Guntur and Prakasam	Red loamy soils, black cotton soils and saline soils.	Rice,Mango, Coton, Sugacane, Chillies, Redgram, Sesamum	800-1100

ANNEXURE-38

CROP INSURANCE SCHEME IN ANDHRA PRADESH

Object: Crop insurance scheme is primarily formulated and introduced by Govt of India to safeguard the interest of the farmers and to protect them against the element of risk and to mitigate the losses incurred by the farmers on account of natural calamities and stabilization of farm income. The risk insurance will be provided to cover yield loss due to following non-preventable risks.

a. Natural Fire and Lightning
b. Storm, Hailstorm, Cyclone, Typhoon, Tempest, Hurricane, Tornado etc.
c. Flood, Inundation and Landslide.
d. Drought, Dry spells.
e. Pests/ Diseases etc.

In India Crop Insurance Scheme for the first time was introduced during 1972 in limited pockets of the country covering limited crops. This was optional for both states and as well farmers. This was implemented on "Individual approach".

Taking the demand for the scheme into consideration, the Govt of India felt the need to make it compulsory in respect of loanee farmers in all the states. Taking the perspective in view in 1976 a committee was constituted under the Chairmanship of Professor DandeKar to go into details and modalities to make "Crop Insurance" more effective and useful to the farmers.

The recommendations of the committee were taken by the Govt of India and the existing crop insurance scheme was revised and a farmer friendly "CCIS" (Comprehensive Crop Insurance Scheme) was implemented from Kharif 1985. The AP State Govt as opted for the scheme and implemented during Kharif 1985 and being continued till 1998-99.

National Agriculture Insurance Scheme:

This scheme was introduced in the country in the year 1999-2000 replacing CCIS. In AP this was introduced in the year 2000-2001 and being continued. This scheme basically on the same principle as that of CCIS as regards risk coverage and yield index. However, under the scheme unlike CCIS, farmers growing notified crops and not taking loans from financial institutions can also opt for coverage. The district wise coverage of crops is as given below:

KHARIF

SL No	District	Crops
1	Srikakulam	1. Rice 2. Bajra 3. Groundnut (UI) 4. Sugarcane (P) 5. Sugarcane ®
2	Vizianagaram	1. Rice 2. Bajra 3. Groundnut (UI) 4. Sugarcane (P) 5. Sugarcane ® 6. Maize 7. Cotton (UI)

18	Adilabad	1. Rice 2. Jowar 3. Maize 4. Sunflower 5. Greengram
19	Karimnagar	1. Rice 2. Jowar (UI) 3. Maize 4. Sunflower 5. Greengram
20	Warangal (MNAIS)	1. Rice 2. Jowar (UI) 3. Maize 4. Groundnut 5. Red Chillies
21	Khammam	1. Rice 2. Jowar (UI) 3. Maize 4. Blackgram 5. Greengram 6. Groundnut 7. Red Chillies
22	Nalgonda	1. Rice 2. Jowar (UI) 3. Blackgram 4. Groundnut

Note: The crops Mesta, Sesasum, Korra, Horsegram and Ragi are not being covered under Crop Insurance

Village Insurance Scheme: To make this scheme more farmer friendly a change has been brought in the scheme reducing homogeneous unit area from mandal to village. During 2005-06 it was introduced in the State on pilot basis in 5 districts and the same crops and districts continued during 2006-07. During 2007-08, 5 more districts were brought under the scheme. This scheme was extended to all districts except Hyderabad, during 2008-09 and the same was continued till 2010-11. During 2011-12 the 4 Rayalseema districts excluded from VIS and brought under WBCIS for Groundnut Crop. At present VIS is being implemented in 18 districts taking one predominant crop during Kharif season only. The notified districts and crops are given below:

District	Crop	District	crop
Srikakulam	Rice	Rangareddy	Maize
Vizianagaram	Rice	Mahaboobnagar	Maize
Visakhapatnam	Rice	Medak	Maize
East Godavari	Rice	Nizambad	Maize
West Godavari	Rice	Nalgonda	Rice
Krishna	Rice	Warangal	Rice
Guntur	Rice	Khammam	Rice
Prakasam	Rice	Karimnagar	Rice
Nellore	Rice	Adilabad	Soybean

Modified National Agriculture Insurance Scheme: This is a scheme almost akin to NAIS with VIS except for the coverage of following risks which are not covered under NAIS:

a. Prevented sowings/planting risks

b. Localized risks like Hailstorm, Landslide etc.

c. Post harvest losses.

On account payment up to 25% of likely claims would be released as advance for providing immediate relief to farmers.

This scheme was introduced during Rabi 2010-11 in SPSR Nellore, Prakasam and Warangal Districts. During 2011-12 the scheme continued in above 3 districts in addition to East Godavari on pilot basis.The same crops being covered under NAIS shall also covered under MNAIS alnong with VIS in above 4 districts.

Weather Based Crop Insurance Scheme: Weather Based Crop Insurance aims to mitigate the hardship of the insured farmers against the likelihood of financial loss on account of anticipated crop loss resulting from incidence of adverse conditions of weather parameters like rainfall, temperature, frost, humidity etc.

Unlike NAIS this is not yield guarantee scheme.

This was introduced as pilot project in 2009-2010 and being continued. During 2011-12 this will be implemented in the following districts covering the crops shown:

Crop:

1. Groundnut – 4 Rayalaseema districts.
2. Chillies – Guntur, Warangal & Khammam
3. Cotton – Khammam, Warangal, Adilabad & Guntur
4. Mango – Ranga Reddy, Chittoor, Khammam, Vizianagaram & Warangal
5. Sweet Lime – Nalgonda & YSR
6. Oilpalm – Khammam & West Godavari
7. Banana (Fruit) – East Godavari, Vizianagaram & YSR.
8. Tomato – Chittoor, Ranga Reddy
9. Brinjal – Ranga Reddy.

Implementing agencies: The following agencies are involved in implementation of crop insurance scheme in the state.

1. Agriculture Department
2. Directorate of Economics & Statistics
3. Agricultural Insurance Corporation.

APPENDIX - I
GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS

Botanical	English	Telugu
1	2	3
CEREALS		
Oryza Sativa	Paddy	Vadlu
Triticum Species	Wheat	Godhumalu
Sorghum Vulgare	Jowar	Jonnalu
Pennisetum Typhoides	Bajra	Sajja or Ganti
Hordeum Velgare	Barley	Barley
Zea Mays	Maize	Mokkajonnalu
Eleusine Coracana	Ragi	Ragi and Chodi
Sateria Italica	Korra (Italian Millet)	Korralu
Paspalum Serobiculatum	Varagu	Arikelu
Panicum Milliare	Samai	Samulu
Panicum Milliaceum	Common Millet	Varigalu
PULSES		
Cicer Arietinum	Bengalgram	Shanagalu
Phaseolus Aureus	Greengram	Pesarlu
Cajanus Cajan	Redgram	Kandulu
Phaseolus Mungo	Blackgram	Minumulu
Dollichose Bifforus	Horsegram	Ulavalu
Phaseolus aconitifolius	Dwegram	Mittikalu or Kumkumpesalu
Dolichos Lablab	Fieldbean	Anumulu
Vignacatjang	Cowgram cowpea	Alasandalu or Bobbarlu
SUGAR		
Saccharum Officinarum	Sugarcane	Cheruku
Phonix Sylvestris	Date palm	Kharjuramu

APPENDIX - I
GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS

Botanical	English	Telugu
1	2	3
CONDIMENTS AND SPICES		
Areca Catichu	Betelnuts	Vakkalu or Pokalu
Cadsicum Annum	Chillies	Mirapakayalu
Zingiber officinale	Ginger	Allam
Curcuma Longa	Turmeric	Pasupu
Allium Sativum	Garlic	Tellagadda or Velluli
Coriandrum Sativum	Coriander	Dhaniyalu or Kottumeri
Tamarindus Indica	Tamarind	Chintapandu
FRUITS AND VEGETABLES		
Musa Sapientum	Bananas	Aratipandu
Vitis Vinifera	Grapes	Draksha
Magnifera indica	Mangoes	Mamidi
Anacardium Occidentale	Cashewnut	Jeedimamidi
Paidium Guajava	Guava	Jama
Sokanum Tukersoum	Potatoes	Urlagadda
Manihot Utilssima	Topioca	Karapendalam
Ipomaca Batatas	Sweet potatoes	Genusugaddalu or Chilagadam
Allium Cepa	Onions	Ulligadda or Nirulli
Olden Landia Unbellata	Chayroot	Chiriveru
Amaranthus	Amaranths	Thotakoora
Solanum Melongena	Brinjal	Vankaya
Lyco Persicum Escenlentum	Tomato	Seema vanga

APPENDIX - I
GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS

Botanical	English	Telugu
1	2	3
OIL SEEDS		
Arachis hypogoca	Groundnut	Verushenaga
Ricinum communis	Castor	Amudalu
Cocos Nucifera	Coconut	Kobbera
Sesamum indicum	Gingelly, Sesamum	Nuvvulu
Brassica campesting	Rape and mustard	Avalu
Carthamu tinctorius	Safflower	Kusuma
Linum Uitastisimum	Linseed	Avisi
Guizotia Abyssinica	Nigersed	Verrinuvvulu
FIBRES		
Gossypium Sp.	Cotton	Prathi
Hibiscus cannabinus	Bombay Hemp	Gogu
Agave Vivipara	Agave	Kalabanda or Kittanara
DRUGS AND NARCOTICS		
Coffee arabica	Coffee	Coffee
Camellia Theiferia	Tea	Theyaku
Borassus Flabellifer	Palmyra	Thati
Piper Betle	Betel vines	Tamalapakulu
Nicotiana Tabacum	Tobacco	Pogaku
Papaver Somniferum	Opium	Nallamandu
MISCELLANEOUS		
IndigoferaTinctoria	Indigo	Neeldi
Phaseous Trilobus	Pillipesara	Pillipesara

APPENDIX – II

CONVERSION COEFFICIENTS

For changing British Units of Weight, Length and Capacity into Metric Units.

I. Standards of Weights

1	Oz	28.3493 Grams
1	Gram	0.0352740 Ounces, 0.09 Tula
1	Pound	0.45359 Kilogram
1	Kilogram	2.20462 Pounds
1	Tonne (Metric Ton)	0.98420 Tons, 1000 kilograms 10 Quintals
1	Ton	1.01605 Metric Tons, 2240 Lbs.
1	Mound	0.037324 Metric Tons, 82.2857 Lbs. 0.3732 Quintal
1	Cwt	0.5010 Quintal
1	Seer	0.9331 kilogram
1	Bale of Cotton lint (392 Lbs)	0.1771 Metric Ton
1	Metric Ton	5.641 Bales
1	Bale of Jute (400 Lbs).	0.181436 Metric Ton
1	Metric Ton	5.5166 Bales of Jute

II. Standards of Area

1	Hectare	2.47105 Acres
1	Acre	0.404686 Hectare, 4840 Sq. Yards (43560 Sq. ft.)
1	Sq.Mile	640 Acres, 2.59 Sq.Kilometres
1	Sq.Kilometre	0.3861 Sq.Mile, 100 Hectares
1	Sq.yard	0.8361 Sq.Metre
1	Sq.Metre	1.1960 Sq. Yards

III. Standards of Length and Capacity

1	Kilometre	0.62137 Mile
1	Metre	1.0936 Yards
1	Yard	0.9144 metre, 91.44 Centimetres
1	Inch	25.4 Millimetres
1	Millimetre	0.04 Inch
1	Galon	4.54596 Litres
1	Litre	0.21998 Gallon
